Hello!

Welcome to all new MBP BizMajic subscribers.

My partner and I are working on a new project that will be coming out in the next week or two. This is a very different type of program than we have done before but one from our own experience is very valuable to those that work home-based businesses and are in need of prospects and tools that will help you succeed with the company you are with.

Stay tuned for pre-launch notification... coming soon!

There will not be an issue next Friday, as I will be getting ready for the much anticipated trip to Malta. There is a lot to get ready including preparing the kids and their Aunt who will be staying with them for the two weeks while we are away.

Look for the next issue coming to you from Malta!

If you are looking for leads that are phone interviewed, phone verified or even surveyed leads .. go to <http://www.mbpadvertising.com> and click on MLM leads. Contact us and we will be happy to provide a quote!

Smile... Be happy and Live life to the fullest.

Enjoy your weekend and tune in next time for another informative issue of MBP BizMajic News.

Article Title: Perception That Can Destroy Your Abundance!
Author: Joseph Miller

This report is part of a series that I've developed to help new home business entrepreneurs succeed. I want to offer some insights into the process of building a nice income with a home-based business. Specifically, this report will cover Network Marketing.

If you are looking at joining a Network Marketing opportunity, you may want to hold onto this report and share it with others you recruit later on. You will most-likely be bringing people into your opportunity who has never been involved with the Network Marketing industry. If you really want to succeed in a major way, it is certainly important that you train and equip the people you recruit, so that they can also achieve success.

Let's get started...

First of all, I'll begin by sounding a bit "negative". I'm certainly not trying to be negative, however, I do want to give you the REALITY- and sometimes reality is tough.

So here you go...

The vast majority of people will fail with ANY opportunity they work. Obviously, there are some reasons for that, many of which do NOT even involve the company or product they are working. I'm sure there were some people who started the first day with Sam Walton but left WalMart because they didn't "see" the potential – or perhaps didn't want to deal with the hardships that come with a new start-up. Imagine where they would be financially today if they had endured those first difficult days?

Success is rarely achieved without proper "seasoning". There are some things that you will need to understand and accept - so you are able to handle success. Without proper training, any success you achieve will likely be short-term.

In the home business industry (specifically Network Marketing), I've found that when people do not succeed the first thing many will do is complain that the opportunity was a failure. The reality is... the person failed the opportunity.

Have you ever had anyone ask you "Is that deal you're in working for you?" I've had it asked of me countless times by people trying to determine if they want to join me in the venture. The question ALWAYS amazes me. I 'm sure what they are "really" wanting to know is if I'm making any money or not. But the question exposes a MAJOR perception problem that we must learn to overcome if we are going to be successful.

When you overcome this obstacle, you will be well on your way to becoming VERY successful in Network Marketing, or any other home business.

The obstacle that you must immediately overcome is... the PERCEPTION that you don't have to put forth an effort to earn a big income.

The reality is... YOU DO!

To assume that all you have to do is sign-up for a "deal" and you'll start raking in boatloads of cash, is simply wrong. Don't buy it, and don't ever use it to recruit others!

Before I expound further, I've got to say this...

I've NEVER had a "deal work for me"! In fact, I've never had a job work for me either. I've always had to put forth the efforts and WORK the opportunity, or work FOR the job.

Unfortunately there's a perception that Network Marketing is an easy way to get fast riches. Many people have been told that "you can get rich without doing anything". Well, that's completely wrong and its part of that whole "something for nothing" lazy attitude that has ruined a lot of people.

I think most people would love to be able to have an easy way of earning a living so they can spend more time with their families, friends, or hobbies. The fact is- Network Marketing DOES provide plenty of opportunities to earn a substantial income, but... it does require some effort!

While Network Marketing is a great way to make a huge income, you just can't sign up and expect the money to drop from the sky. Get that in your mind right now, and you'll avoid major disappointment later.

Major Effort, Major Income

The best part is... your earnings are directly reflective of the effort you put forth! Unlike most jobs where a salary is usually "capped" and paid regardless of how hard you work, Network Marketing will reward you handsomely if you invest some effort in it. In fact, I've personally found that I can put half the work into a good Network Marketing Opportunity, and reap much greater financial rewards than working a 9 to 5 job.

Think about this...

If you work a JOB for 40 years, you can get a nice recliner when you retire- and then get a tiny retirement check every month. With Network Marketing, you can work hard for FAR LESS TIME and also earn a nice residual monthly check... AND ENJOY IT while you are still young!

As a personal example...I worked for 20 years with an organization to reach a certain annual salary level. When I started Network Marketing (working part time), in less 13 months time, I was already making over DOUBLE my full-time salary. Needless to say, I quit my job and started working for myself!

And another thing is...

With Network Marketing you also get to earn an income on the efforts of others. Most jobs certainly don't allow that to happen, so it's definitely a bonus with Network Marketing.

Here are some key POINTS:

1. Understand that you will have to put forth an effort with this opportunity - doing so, will bring HUGE rewards. I built a very large 5-figure monthly part-time income because I put in CONSISTENT efforts early on. Every day, I did something to build my business- and it paid off in a MAJOR way. This is a business opportunity, not a money game.

2. Establish a Mindset for Success and be DETERMINED to reach it. I built my first downline of 30,000+ starting with ONE person. Several times, I had the opportunity to quit... but KNEW that if I was consistent and PERSISTENT, I would succeed. A high percentage of people will quit when they are faced with a couple obstacles. We grow when we're uncomfortable- not when things are easy. If you want to grow (a big income), be prepared to go over obstacles; jagged rocks, tall mountains, and lonely forests.

3. Help the people in your group to succeed. If you work with them to succeed, you will be multiplying your earning potential. Their success builds your success. If you learn how to duplicate your efforts, and then teach your people how to do the same... you will see how quickly your business will grow. Duplication and leverage are major components to building a wildly successful Network Marketing income.

One other thing ... here is a RULE that you need to know, and pass on to your group...

"The people you recruit will likely do EXACTLY as you do."

If you give out product as a sample, they will give out product as samples. If you get on autoship immediately, they will also get on autoship.

The seeds that are in you (whether good or bad) will be passed on and will grow throughout your group...Seeds of ABUNDANCE, as well as seeds of discouragement, and un-belief. Make sure you are planting a good crop!

Leverage your time and the efforts of others, and you will reap a huge financial reward!

JOKE OF THE WEEK
--*-- --*-- --*-- --*-- --*-- --*-- --*--

Old Age

Two elderly ladies had been friends for many decades. Over the years, they had shared all kinds of activities and adventures. Lately, their activities had been limited to meeting a few times a week to play cards. One day, they were playing cards when one looked at the other and said, "Now don't get mad at me .. I know we've been friends for a long time, but I just can't think of your name! I've thought and thought, but I can't remember it. Please tell me what your name is."

Her friend glared at her. For at least three minutes she just stared and glared at her.

Finally she said, "How soon do you need to know?"

~~~~~

Two elderly women were out driving in a large car - both could barely see over the dashboard. As they were cruising along, they came to an intersection. The stoplight was red, but they just went on through.

The woman in the passenger seat thought to herself "I must be losing it. I could have sworn we just went through a red light." After a few more minutes, they came to another intersection and the light was red again. Again, they went right through. The woman in the passenger seat was almost sure that the light had been red but was really concerned that she was losing it. She was getting nervous.

At the next intersection, sure enough, the light was red and they went on through. So, she turned to the other woman and said, "Mildred, did you know that we just ran through three red lights in a row? You could have killed us both!"

Mildred turned to her and said, "Oh, crap, am I driving ?"

4.) Software Compatibility - This is pretty much the same as the one above. The Upgrade Advisor will also check the software you have installed on your computer for any problems. If there are any issues, it will list them out for you and even give you some recommendations on how to fix them. You can then go through those suggestions and get your computer all ready for the new Vista.

5.) Update, Update, Update - As you can probably tell, this one is about updating your computer. It's important that you have all of the most recent security and hardware updates installed on your computer. If you're not up to date, how do you expect Vista to be able to work right for you?!

6.) Requirements - Before you do anything, you'll want to make sure that your computer does match all of the system requirements for Vista. You can find a list of all of those right here. Do take the time to look over them carefully, because if you're missing just one little piece of the puzzle, Vista will not work properly and it could end up causing you more trouble down the road. Also, make sure you have the right amount of disk drive space for Vista. If you don't, you could run into some additional trouble.

7.) Security Software - If you have an antivirus program or any other security type software installed on your computer, you'll want to either uninstall them or, at least, disable them before you go on with the Vista upgrade. These types of programs are known for causing problems with new Windows installations, so you'll want to make sure they're all turned off before you begin.

8.) Take Your Time - If you've followed all of the above tips and you think you're really ready to begin your upgrade, make sure you have enough time to do it right. The Vista upgrade can take up to several hours, so you'll need to be prepared for the long haul. Maybe plan a Saturday that you can use to get the whole thing done. Chances are, you'll need to be around or near your computer during the whole installation, so you can't put the disk in and then leave. Just keep your computer in sight and your install will go so much better.

Alright, there you have it. If you follow these eight steps, your Vista upgrade will go as well as you could ever imagine. It will run smooth and your computer will then be at its best for you. And nothing's more important than that!

Until next week, stay safe out there
